

## **NB CHILLI PEPPER**

**£54,950.00**

### **ADDITIONAL INFORMATION**

<b>Style</b>	Cruiser
<b>Length</b>	50ft - 60ft
<b>Berth</b>	2/4

### **HULL:**

NB Chilli Pepper is a lovely boat with the popular reverse layout, a quality fit out and having had a full repaint in May 2023. The interior layout flows well and has been well thought out for continuous cruising or as a live aboard. She has a spacious cruiser stern with a black canvas pram hood, providing ample additional under-cover deck space or a perfect place for summer relaxation with friends and family. With an unusually generous cabin height of 6ft 9" (2,06m), her interior feels extra spacious. Warmth is provided by the diesel-fired Webasto servicing the 2 radiators in the saloon, the one radiator in the bedroom and the heated towel rail in the bathroom.

### **GALLEY (9'2"/2,8m):**

Stepping down into the boat from the rear cruiser stern, we enter the practically laid out galley. There is ample work top area and plenty of storage in this ideally located kitchen where the gourmet will never feel isolated from what is happening either on the rear deck or in the main living area of the boat. Appliances include a Midi Prima double oven, 4 burner gas hob, Beko fridge with freezer compartment and a microwave oven.

**E&OE**

**SALOON (16'6"/5m):**

The galley and saloon are well lit via the numerous bus style windows and the open plan design and high ceilings all work together to create an uncramped and spacious living space. There is a stylish 4 seater table and chairs closest to the galley and a comfortable sleeper couch and well appointed entertainment centre complete with a Panasonic 31" TV forward of that.

**BATHROOM (6'0"/1,8m):**

The spacious walk-through bathroom has a quadrant shower, a Thetford cassette toilet and a corner vanity with porcelain hand basin and storage beneath. The heated towel rail provides warmth to this area.

**BEDROOM (7'9"/2,4m):**

The main cabin is at the front of the boat with double doors between 2 spacious cupboards opening out onto the well deck. The fixed double berth has additional storage underneath, there is a panel radiator on the opposite wall and a storage shelf above the bed.

**ENGINE ROOM AND ELECTRICS:**

Powered by a Canaline 38hp engine with skin tank cooling and a PRM 120 D2 gearbox. Water on board is heated via the engine, the immersion heater or the Webasto diesel heater which was fitted new in 2022. There is one starter and two domestic batteries. The inverter is a Sterling Pro Combi. Fuel capacity is 182 litres and the water tank holds 455 litres

**OTHER EQUIPMENT:**

2 x 13kg gas cylinders.
